

We Show Up

We Bring It

We Do It Right

Cold Stone

Heartland recently worked on a glass encasement project for our local Cold Stone Creamery. Emphasizing top-notch quality, we utilized our experience, skill, and industry knowledge to craft a splendid showcase that not only showcases the inviting array of their ice-cream offerings, but also aligns with the vibrant and welcoming ambiance of the creamery.

THE CHALLENGE

The application of silicone did not turn out as expected, resulting in a flawed outcome. It failed to adhere properly to the surfaces, causing it to look messy and unkempt in some areas.

OUR SOLUTION

Our effective solution to address this problem involved a two-step process. Initially, we meticulously removed the incorrectly-applied sealant. Thereafter, we skillfully reapplied the silicone, ensuring a smoother and more aesthetically pleasing result.

RESULTS ACCOMPLISHED

Heartland successfully rectified the glass encasement project for Cold Stone Creamery, achieving a flawless finish that enhanced ice cream presentation. Our meticulous approach exceeded client expectations, addressing aesthetic concerns and ensuring durability.

Why was Brin Glass best suited for the work?

“I appreciate all you’ve done on this project. In this industry, it’s not a matter of if, but when something doesn’t go as planned, how it’s handled is what I care about. You and the entire Heartland team have been great!”
