

We Show Up

We Bring It

We Do It Right

Sauk Rapids-Rice Middle School Pool Conversion

At Sauk Rapids-Rice Middle School, students are responsible for their learning. Our students are discovering the type of student they want to be and how to get the most out of their education. Our staff provides a supportive environment and services to help students excel academically and develop accountability.

THE CHALLENGE

Out of specification glazing was installed, once the error was noticed by Heartland Glass; the proper glazing was ordered and installed to meet the safety specifications needed for the school.

OUR SOLUTION

After becoming aware of an internal error, immediate measures were taken to rectify the problem. This included the removal of any incorrect material that had previously been installed as part of the process. Following the elimination of the faulty material, the correct materials were then inserted. This quick and efficient response ensured that the issue was properly noticed and acknowledged, allowing for the smooth reinstatement of normal operations.

RESULTS ACCOMPLISHED

As a result of these corrections and improvements, a brand new multipurpose space was realized. This large area now serves as a flexible venue capable of hosting a variety of activities and events. The transformation has not only modernized the space, but it has also transformed it into a hub of activity, attracting a diverse group of people eager to utilize the fitness center and multipurpose room for their various needs.

Why was Brin Glass best suited for the work?

Formerly an inactive pool area since 2008/2009, this space has undergone an incredible transformation to better service our students and community. We are excited about the endless possibilities this space offers for enriching educational experiences and fostering community engagement!”
